AUTHOR Bayuk, Milla, Comp.; Bayuk, Barry S., Comp.
TITLE Suggestology and Suggestopedia: A Selective Bibliography of Western Sources.
PUB DATE 80
NOTE 34p.

EDRS PRICE MF01/PC02 Plus Postage.
DESCRIPTORS *Cognitive Processes; Educational Psychology; *Learning Theories; Music; Perception; Psycholinguistics; Psychophysiology; *Second Language Instruction; *Teaching Methods
IDENTIFIERS *Lozanov Method; *Suggestopedia

ABSTRACT

Newcomers to the field of suggestopedia, or the Lozanov method, are at a loss as to how and where to obtain literature on this subject, thus prompting the publishing of this bibliography. Recent interest has been spurred by, among other things, the establishment of the Society for Suggestive-Accelerative Learning and Teaching (SALT) in America and the publishing in English of Lozanov's "Suggestology and Outlines of Suggestopedy." This bibliography, with more than two-hundred titles, was compiled with information from ERIC, Social Scisearch, Comprehensive Dissertation Abstracts, Language and Language Behavior Abstracts, and an MLA bibliography. In addition to the works dealing directly with suggestopedia, an addendum with 22 titles lists: (1) sources dealing with psychological and physiological research on the brain and its function in learning, (2) works treating subliminal suggestion and perception, and (3) papers on the influence of music on learning and behavior. I N T R O D U C T I O N

Despite the fact that suggestopedia as a classroom pedagogy has been used since the mid-sixties in the Soviet Block countries, Western interest in this revolutionary methodology, often referred to as the Lozanov method, was not awakened until the appearance of Ostrander and Schroeder's Psychic Discoveries Behind the Iron Curtain (1970) and Lozanov's Suggestologia (1971). Several factors contributed to the spread of suggestopedia in the West: experiments by Western pioneers of the method; the establishment of the Society for Suggestive-Accelerative Learning and Teaching (SALT) in Des Moines (later moved to Ames, Iowa); the opening of the Lozanov Learning Institute in Silver Springs, Maryland; the publication in English of Lozanov's Suggestology and Outlines of Suggestopedy (1978) and Ostrander and Schroeder's Superlearning (1979), and the founding of the Journal of Suggestive-Accelerative Learning and Teaching (1976).

Unfortunately, newcomers to suggestopedia are often at a loss as to how and where to obtain literature on the subject. Few university libraries subscribe to the Journal of SALT. The Library of Congress neither subscribes to the journal nor con-

tains among its holdings Eastern European documents on suggestology and suggestopedia. The Bulgarian journal Suggestology and Suggestopaedia is difficult to obtain; only three issues have so far reached the West (1975, Nos. 1-3). Problemi na Suggestologiyata, which contains the proceedings of the 1971 Varna Conference on Suggestology and Suggestopedia, is part of private library collections; the compilers of this bibliography have been unable to locate a single copy of Problemi in any library either in the United States or Canada.

This bibliography was compiled with the assistance of a Dialog computerized search undertaken at the University of West Florida. Information was retrieved from the following databanks: ERIC, Social Scisearch, Comprehensive Dissertation Abstracts, Language and Language Behavior Abstracts, and MLA Bibliography. Literature containing the key words "Lozanov, the Lozanov method, suggestology, suggestopedia or suggestopaedia, suggestopedy or suggestopaedy, suggestive-accelerative learning and subliminal perception and learning" was searched out and selections narrowed to entries that were found to be most pertinent to the field of suggestopedia as it applies to language learning and teaching, although a few articles on other disciplines taught suggestopedically were included to demonstrate the wide applicability of the method.

Some of the transliterations from Bulgarian, Russian and French were slightly modified to assure uniformity, however,

every effort was made to preserve phonetic values of the original languages. Easily understood common symbols rather than the I.P.A. notations were used to make foreign entries less forbidding to non-linguists.

Lozanov's theories on suggestology and its applications draw support from a wide range of disciplines. The reader's attention is directed to some samples of pertinent related works listed in the Addendum.

Since suggestology is the study of suggestion, it is closely associated with psychological and physiological research on the brain and its function in learning. For further reference, see:

Blakeslee, T. The right brain. New York: Anchor-Doubleday, 1980.

Bogan, J.E. The other side of the brain: An oppositional mind. Bulletin of the Los Angeles Neurological Societies, 1969, 34, 135-162.

Bogan, J.E. Split-brain research and education. Brain Mind Bulletin, 1975, 1(3), 1-2.

Ferguson, M. The brain revolution. New York: Bantam, 1975.

Lawrence, J. Alpha brain waves. New York: Avon Books, 1972.

Penfield, W. The mystery of the mind. Princeton: Princeton University Press, 1980.

Pines, M. The brain changers. New York: Harcourt, Brace and Jovanovich, 1973.

Pribram, K.H. and Broadben, D., (eds.). Biology of memory. New York: Academic Press, 1970.

Inasmuch as suggestion influences people "without" their conscious knowledge, attention could be directed to works deal-

ing with subliminal suggestion and perception:

Dixon, N.F. Subliminal perception: The nature of the controversy. London: McGraw-Hill, 1971.

Key, W.B. Subliminal seduction. New York: Signet, 1974.

Packard, V. The hidden persuaders. New York: David McKay, 1957.

Receptivity to suggestion is dependent on man's state of consciousness. Related literature includes:

Arnold, M.B. On the mechanism of suggestion and hypnosis. Journal of Abnormal Psychology, 1964, 41, 107-128.

Barber, T.X. Biofeedback and self-control. Chicago: Aldine-Atherton, 1971.

Eliade, M. Yoga, immortality and freedom. New York: Bollingen, 1958.
